FRAME - A Modular and Flexible Space Solution

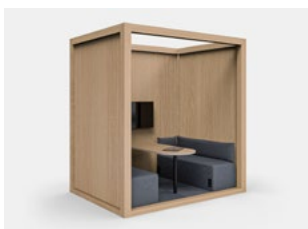

The CREADECK Frame makes it easy to build different kinds of flexible spaces with a smart frame structure. Its modular design means you can quickly change or update the space when needed. CREADECK Frame offers an affordable way to create spaces that can easily adapt to different uses.

STRUCTURE

The CREADECK FRAME has a modular wooden frame and a raised floor covered with a textile mat. Electrical wiring and technology can be transported in the frame and under the floor to the desired location.

FURNITURE

The CREADECK space can be furnished with standard furniture as well as CREADECK furniture which can be locked on the CREADECK-floor. Integrated power outlets in CREADECK furniture bring the electricity and AV technology easily to the reach of the user. CREADECK-furniture

WALL ELEMENTS

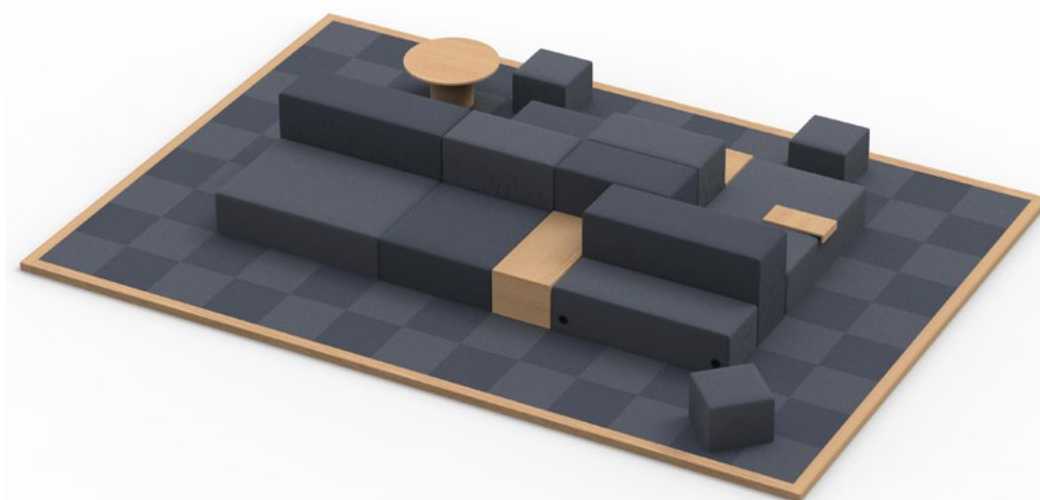

Different spaces and atmospheres can be created with the wall elements attached to the frame. Modular wall elements are glass, plywood, whiteboard, and slatted walls. The locations of the walls can be easily modified with the help of ready-made fastening points. The "roof" of the

FRAME

CREADECK FRAME consists of a smart floor, a frame structure, and integrated furniture. The frame structure allows for the use of different wall elements to divide the space. Electricity can be transmitted to the furniture via the pillar structure and a smart floor. CREADECK furniture can be locked in place on the floor to maintain the interior design concept in the space.

OASIS

CREADECK OASIS consists of a smart floor and furniture that can be integrated into it. The electrical wiring of the CREADECK furniture can be installed to be invisible under the CREADECK floor. CREADECK furniture can be locked in place on the floor to maintain order in the room.

Wall - Modular wall panel system

Creadeck Wall is a modular wall panel system that lets you shape your environment with ease and elegance, offering endless configuration possibilities and the freedom to evolve your space as your needs change. Behind the clean surfaces, cables, sockets, switches, lighting, and smart devices can be tucked neatly out of sight, keeping interiors sleek, functional, and clutter-free. Whether you're designing a calming home office, a buzzing collaboration space, or a welcoming public area, Creadeck Wall gives you the tools to create a space that works beautifully and feels even better.

DIMENSIONS & CUSTOMIZATION

Creadeck Wall panels come in a selection of standard sizes designed to fit most interior layouts effortlessly. But we believe true beauty lies in flexibility. That's why we offer full customization: dimensions, materials, integrated elements, and configurations can all be tailored to your project. Whether you're designing a cozy corner or a sprawling open space, Creadeck Wall adapts to your vision—and grows with you.

Air - Space Divider System

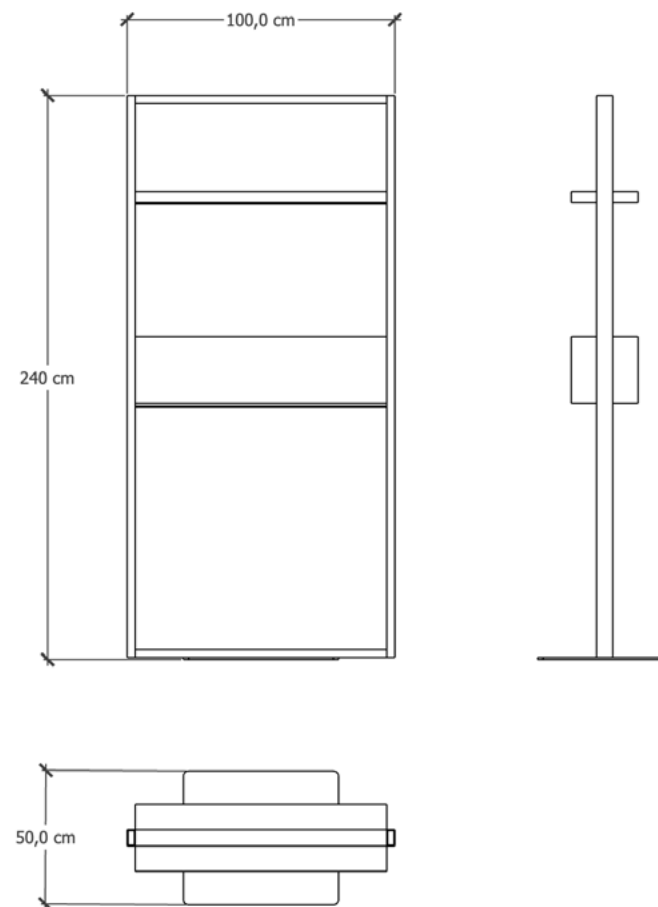

AIR is a versatile and fully customizable room divider designed to adapt to a variety of spaces and needs. Its sleek frame, crafted from painted steel tubing, provides a sturdy yet elegant foundation. What lies within the frame is entirely up to you—AIR can be equipped with shelves, plant boxes, and a wide selection of wall elements to create the perfect balance of function and style.

Air - Space Divider System

Air - Space Divider System

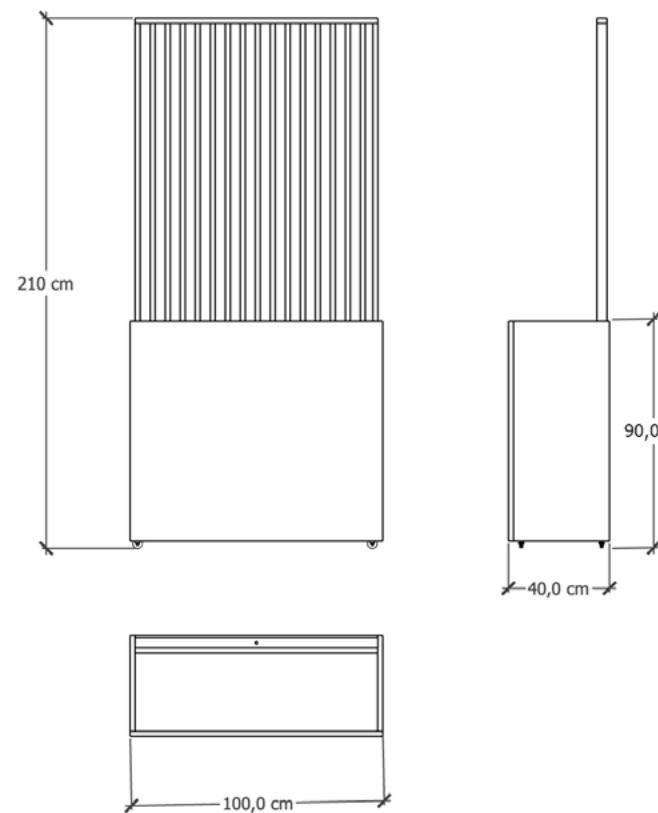

DIMENSIONS & CUSTOMIZATION

All AIR space dividers are available in a range of standard dimensions designed to suit most interior layouts. However, flexibility is at the core of the AIR concept—we also offer full customization in size, materials, and configurations to perfectly match your space and needs. Whether you're furnishing a compact office or a large open-plan area, we'll tailor the solution to fit seamlessly.

Plant - Space Divider

Plant - Space Divider

DIMENSIONS & CUSTOMIZATION

You can customize the Creadeck Plant Space Divider with a variety of colors, finishes, and wood materials to suit your interior. Whether you're furnishing a modern office or a cozy public space, we'll help you create the right combination for a perfect fit.

A stylish way to divide space with plants—perfect for offices and other public spaces. The Creadeck Plant Space Divider brings natural beauty and a warm, welcoming feel to any interior. The wooden design pairs beautifully with living plants, creating a soft and organic look.

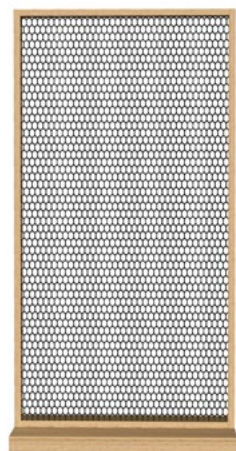

Floor Screens

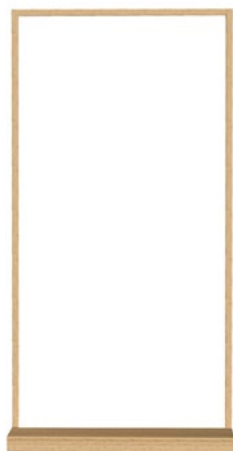

Floor Screens

CREADECK floor screens divide spaces into zones easily and elegantly. Thanks to the intelligent frame structure, the technology runs in the structure away from sight. Integrated wheels and a modular design allow the easy modification of the space during the day. CREADECK floor screens are based on a wooden frame combined with various materials and colors.
